SUMMARY

Data Scientist with 2+ years of experience in classical machine learning, econometrics, and mathematical programming. Specializing in scalable ML solutions and financial analytics. Delivered clustering pipeline for 120M+ users and deployed NPV models to production, driving data-driven decision-making. Proficient in Python, SQL, and end-to-end ML pipelines.

EDUCATION

Lomonosov Moscow State University (Master's degree) — September 2024 - June 2026
Faculty of Computational Mathematics and Cybernetics (*GPA:* 4.4/5).

Lomonosov Moscow State University (Bachelor's degree) — September 2020 - June 2024
Faculty of Computational Mathematics and Cybernetics (*GPA:* 4.3/5).

WORK EXPERIENCE

Sber — May 2024 - Present
Data Scientist, Investment Expertise Directorate (Finance Division)

- Architected and productionized a scalable customer clustering pipeline for 120M+ profiles using PySpark.
- Led R&D to define, implement a new bank-wide metric, including statistical evaluation and experiments.
- Developed, validated, and deployed ML and econometric model to estimate product NPV; integrated them with data pipelines and established monitoring, maintenance, and business-acceptance procedures to ensure robustness and interpretability.
- Stack: Python (PySpark, Pandas, Scikit-learn), SQL, Hive, Git, Excel.

Sber — August 2023 - March 2024
Intern, Balance Sheet Structure Department (Finance Division)

- Refactored and modularized legacy Python prototypes, added unit tests and documentation to improve maintainability and accelerate onboarding.
- Integrated a pre-trained ML model into the production pipeline, improving target prediction quality by 30% on validation data and ensuring reproducible inference.
- Optimized the main computation (profiling-driven algorithmic refactor and vectorization), achieving a 3× speedup and reduced memory footprint.
- Developed automated ETL workflows to extract, validate and preprocess large datasets from HDFS using PySpark/Python, with logging and error handling for reliable runs.
- Stack: Python (PySpark, Pandas, Scikit-learn), SQL, Hive, Excel.

SKILLS

Programming:	Python, SQL, C/C++
Data & ML:	PySpark, Pandas, NumPy, SciPy, Scikit-learn, PyTorch, SQL, Hive
Tools:	Git, Excel
Concepts:	Feature engineering, clustering, time-series, econometrics, model deployment

PROFESSIONAL DEVELOPMENT

- *Apache Spark for Data Analysis Tasks* — Sber University — Certificate
- *Methods of Data Analysis and Machine Learning* — Sber University — Certificate
- *Spark Advance* — Sber University — Certificate
